Subject: Ring Seal pails & Lever Lock rings

Dear CSC Customer,

We want to take this time and remind customers that purchase a Ring Seal package about the importance of purchasing the pail, cover and lever locking ring directly from CSC in order to maintain their UN integrity.

Most of our steel pails that use a ring seal cover and lever locking ring are UN rated, which means the package is UN tested and approved by CSC. It is critical then that CSC ensure that all the components of a UN rated package are purchased and used as instructed.

If you are not using a lever locking ring from CSC, we will not be able to UN certify the package you buy. If you need it to be UN rated and you are not purchasing the Lever Locking ring from CSC, you will need to have the package tested, certified, and marked. CSC will continue to sell you the package, just with no UN certification or UN rating. If you are currently buying the complete Ring Seal Package from CSC, then you are 100% compliant and no action is needed.

To help keep our customers in compliance, we created a tracking report which shows the purchases of steel pails, ring seal covers, and lever locking rings. If our report shows a significant difference between pails, covers, and rings, your sales rep will be in touch with you. Our goal for doing this is to keep CSC and our customers in total UN compliance. We thank you for your cooperation in this critical matter.

If you have any questions or concerns, I encourage you to contact me at 216-310-4041 or by email at <u>droether@cscpails.com</u>.

Sincerely,

Daniel Roether Vice President of Sales
